Setting up Your Phone

Follow these step-by-step instructions to set up your M2.

1. **Remove SIM Tray**
   - Remove the SIM tray by inserting a pin eject key/paper clip in the small circular hole at the bottom of the tray. The tray will then eject from the phone.

2. **Configuration 1: Dual SIM Standby**
   - Orient SIM card to match layout on tray.
   - SIM 1 (Nano) supports 4GLTE connections.
   - SIM 2 (Nano) supports 4GLTE connections.

3. **Configuration 2: microSD™ Card/SIM**
   - Orient microSD card to match layout on tray.
   - microSD card supports up to 64GB.
   - SIM 2 supports up to 64GB.

4. **Replace SIM Tray**
   - After placing the SIMs and/or memory card in the tray, slide it back into its slot. It will snap and hold in place.

5. **Charge/Sync**
   - Plug in the microUSB connector to charge the phone or transfer data.

6. **Get Started**
   - Power off the phone before inserting any cards!
   - SIM cards are small enough to become a choking hazard, so please keep them away from children.
   - SIM cards are also quite delicate. Please be careful when handling your card.

**WARNING:** Some countries, states, or provinces do not allow the exclusion or limitation of implied warranties or the limitation of incidental or consequential damages for certain products supplied to consumers, or the limitation of liability for personal injury, so the above limitations and exclusions may not apply to you. When the implied warranties are not allowed to be excluded, the duration of an implied warranty is limited to the duration of the applicable written warranty. This warranty gives you specific legal rights which may vary depending on local law.
**FCC Information**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment generates and can radiate radio frequency energy, and, if not installed and used according to the instruction manual, can cause harmful interference to radio communications. Federal Communications Commission (FCC) regulations state that improper use of this equipment can cause harmful interference to the equipment.

The equipment generates and can radiate radio frequency energy, and, if not installed and used according to the instruction manual, can cause harmful interference to radio communications. Federal Communications Commission (FCC) regulations state that improper use of this equipment can cause harmful interference to the equipment.

This device complies with Industry Canada licence-exempt RSS standard(s).

1. This device may not cause interference, and
2. The user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Consult the dealer or an experienced radio/TV technician for help.

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured to not exceed the exposure limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to ensure the safety of all persons, regardless of age and health. The SAR values for this device were tested for use at the ear and when properly worn on the body, in accordance with政府 guidelines. When these products are used as intended, they meet the government requirements for safe exposure. When body-worn operation is anticipated, the SAR values should be reviewed to ensure compliance with the guidelines. The highest SAR values for this model phone when tested for use at the ear is 0.601 W/kg and when worn on the body is 0.981 W/kg.

The SAR values for this model phone when tested for use at the ear is 0.601 W/kg and when worn on the body is 0.981 W/kg.

Body-Worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user’s body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
