Setting up Your Phone

Follow these step-by-step instructions to set up your M3.

WARNING: SIM cards are small enough to become a choking hazard, so please keep them away from children. SIM cards are also quite delicate. Please be careful when handling your card.

1. Remove SIM Tray

- Remove the SIM tray by inserting a pin eject key/paper clip in the small circular hole at the bottom of the tray. The tray will then eject from the phone.

2. Configuration 1: Dual SIM Standby

- Orient SIM card to match layout on tray. SIM 1 (Nano) supports 4GLTE connections. SIM 2 (Nano) supports 4GLTE connections.

3. Configuration 2: microSD™ Card/SIM

- Orient microSD/SIM card to match layout on tray. microSD card supports up to 64GB. SIM 1 SIM 2

4. Replace SIM Tray

- After placing the SIMs and/or memory card in the tray, SIM 2 (Nano) supports 4GLTE connections. Push in the tray. The tray will then hold in place.

5. Charge/Recharge

- Plug in the microUSB connector to charge or transfer data.

M3 Overview

Front/Back

- Front camera
- Front control

Bottom

- AUX-in/Headset jack
- Microphone
- MicroUSB connector
- Speaker

Warning:

Some countries, states, or provinces do not allow the exclusion or limitation of implied warranties or the limitation of incidental or consequential damages for certain products supplied to consumers, or the limitation of liability for personal injury, so the above limitations and exclusions may not apply to you. If you have any questions, please contact your authorized dealer or reseller. In the event that your authorized dealer or reseller is not located in your area, it will be limited to the duration of the applicable warranty or your local law.
FCC Information
1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
   (1) This device may not cause interference, and
   (2) This device must accept any interference, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

NOTE:
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
   (1) Reorient or relocate the receiving antenna.
   (2) Increase the separation between the equipment and receiver.
   (3) Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
   (4) Consult the dealer or an experienced radiotelecommunications technician for help.

IC Statement
This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:
   (1) This device may not cause interference, and
   (2) This device must accept any interference, including interference that may cause undesired operation of the device.

SAR Information Statement
Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. These limits are comprehensive guidelines and establish permitted levels of RF energy for the general population. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The SAR limit set by the FCC is 1.6 W/kg. The highest SAR value for this model phone tested for use at the ear is 0.601W/Kg and when worn on the body, as described in this user guide, is 0.981W/Kg (Body-worn operation).

Body-Worn Operation
This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user’s body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components (Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided). Use only the supplied or an approved antenna. The highest SAR value for this model phone when tested for use at the ear is 0.205W/Kg and when worn on the body is 0.261W/Kg. The maximum SAR in hotspot mode is 0.981W/Kg. This device was tested for typical body-worn operations (wearing the device on the waist) in compliance with the guidelines on Specific Absorption Rate (SAR) for mobile phones. A minimum separation distance of 15 mm must be maintained between the user’s body and the device when the device operates in hotspot mode. To comply with RF exposure requirements, a minimum separation distance of 15 mm must be maintained between the user’s body and the device when the device operates in hotspot mode.

Le présent appareil est conforme aux CNR d’Industrie Canada applicables aux appareils radio exempts de licences. Ce dispositif est conforme aux normes autoréactrices du Canada RSS d’industrie.

IC identification number: 2ADINNUUM2 Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications & Internet Association (CTIA) web-site at http://www.wow-com.com. * In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 W/kg averaged over 10 grams of tissue. The standards incorporate a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

SAR information on this model phone is comprehensive and includes the antenna’s actual position. SAR data for all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is comprehensive and includes the antenna’s actual position. SAR data for all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines.
